

Computer Architecture

1.Construct a detailed concept map showing the relationship between CPU (ALU, Control Unit,Registers), memory (cache, RAM), and I/O devices. Extend the map to

Also, represent how bench marking is used to evaluate performance.

3. Create a concept map comparing 8085 and 8086 architectures, including their instruction sets, register organization, addressing modes, and memory

5.Prepare an elaborate concept map integrating number systems (binary and hexadecimal) within struction representation, memory storage, and debugging
